COVERING STOCK OFFERED BY

Phone Ballard 1776

CLARKE NURSERY CO. SAN JOSE, CALIF.

6-23-3

WHOLESALE PRICE LIST

SEASON 1932-1933

PLEASE NOTE

All summer quotations not accepted to date are hereby cancelled.

Terms. To buyers of known or established credit, 60 days from date of invoice. Otherwise cash with order or 25% with order, balance C. O. D.

Grading. Plants that are wider than tall are graded by width.

Quantities. Five or more plants of one kind and size will be supplied at 10 rate; 25 or more at 100 rate; 300 or more at 1000 rate. For less than 5 of one kind and size add 20% to 10 rate.

Pots. Prices do not include pots and unless otherwise instructed plants will be shipped without them. If wanted in the pots they will be charged for at cost, but may be returned and credit will be given.

Packing. At cost as usual, including paper pots if used. Plants will be packed to secure lowest possible freight classification consistent with the nature of goods shipped. All prices are at our nursery unless otherwise stated. Packing free if cash comes with order.

Shipping. Our responsibility ceases when goods are delivered to transportation company in good order. They travel at buyer's risk. Please state distinctly whether you wish goods shipped by freight or express and where water shipment is possible be sure to specify by water or rail as you may prefer.

Nomenclature. Plant names, both botanical and common, conform with "Standardized Plant Names," with the addition of a few common names widely used on the Pacific Coast.

This list covers items of which we now have a fairly good supply unsold. Many other things can be furnished in moderate quantities and quotations will be made on request. So if you want any ornamental stock not listed here write us about it.

This list is for the trade only and all prices are strictly net. Landscape Architects and Landscape Gardeners who are not actual nurserymen will be charged $20\,\%$ in addition to the rates quoted herein.

Lining Out Stock

We offer many items in small sizes for growing on. They are not listed separately but will be found at the end of each item if any stock is available for that purpose. We particularly call attention to grafted conifers in 4-inch pots.

Abbreviations

It is important for buyers to know whether they are getting seedlings or cuttings, etc., so for every item we have shown how it was propagated using the following abbreviations:

B—budded

C—cuttings

G—grafted
S—seedlings

To Eastern Nurserymen

It will pay you to look through our list carefully. We grow many items that cannot be obtained East and others which can be bought to better advantage here.

California may seem remote, but freight is not serious on deciduous items. Also we are often able to include orders in car loads which take a very low freight rate.

Spring shipment to any Eastern point is perfectly safe and practical via S. P. R. R. to New Orleans, thence by rail if destination is inland or via steamer to Atlantic Coast points. The freight rate is just the same as if shipped direct over the mountains.

This is how it works out:

Lincoln Park, N. J., Mar. 24, 1932

"I received the trees yesterday in wonderful condition. I was surprised considering the distance they travelled." -Molzan Nursery.

He was surprised, but we were not, as we pack so that they will arrive in good condition.

We particularly call your attention to the following lines:

IAPANESE FLOWERING CHERRIES

(both weeping and erect)

FLOWERING FRUIT TREES in general COTONEASTERS (bush and standard)

BIRCH, Cutleaf Weeping and Young's Weeping HAWTHORN (Crataegus), Paul's, etc.

LABURNUM vossi

MAPLE, Schwedler's

ROBINIA hispida macrophylla (Standards)

SYCAMORE (Platanus orientalis)

LILACS, Named Varieties

IVY, Yellowedge Algerian

WISTERIA (climbers and tree-shaped)

ROSES, Bush and Standards.

We can supply Birches, Hawthorns, Maples, Robinia hispida macrophylla and Sycamores in car lots and will quote special rates for large quantities on request.

We can always supply Boxwood, Phoenix (Date Palm) and Kentia Palms in carload lots. If interested write for current prices.

We solicit inquiries for anything in the nursery line produced on the Pacific Coast.

W. B. CLARKE & FOR San Jose, CASE.

OOT ILL BILD		
NOTE—A large proportion of our conifers are gra ling roots which gives them a far better root syste. grown from cuttings. We call particular attentic conifers offered in 4 in. pots. These were grafted o stock in Summer 1931, transplanted to 4 in. pots is so now have had a full season's growth. This g excellent root system and makes them far better a fitable for growing on than newly grafted stock in We use this 4 in. pot stock for our own planting ar mend it highly to our customers. Much of it is for retail sales.	d ca larg	n recom-

Lilacs

Named Varieties

We have tested about 150 varieties and gradually eliminated all but the very best sorts. All are grown by budding and as we pinch them when only a few inches tall they are all well branched and practically all bloom from first season on.

Sizes available for each variety are indicated by letters A, B, C, etc., following names in variety list below.

Roses

We grow both bush and standards extensively and specialize on the best of recent sorts. As this list goes to press we are dig-ging and do not want to issue new list until that job is com-pleted and we know just what is unsold.

STANDARD ROSES

Our stock this year is the best we have ever raised. All stems are $3\frac{1}{2}$ ft. tall. All dormant budded (3 buds) and grown on for at least one year.
